

APPLICATION FOR FULL MEMBERSHIP OF CANCER PREVENTION EUROPE

The international and multidisciplinary Cancer Prevention Europe (CPE) consortium was created in 2018 to develop world-class prevention research to be translated into effective cancer prevention guidelines and policies at the national and international level. CPE is a consortium of leading European research institutions committed to prioritizing cancer prevention through cooperation between countries and programmes.

The mission of CPE is to reduce morbidity and mortality from cancer in European populations through prevention and earlier detection of the disease. This will be accomplished through (1) research into optimizing the implementation of known preventive strategies, (2) the dissemination of established best practices in prevention, in order to see innovative research translated into effective cancer prevention guidelines and policies nationally and internationally, and (3) research into the identification of novel targets for prevention.

The organizational structure of the CPE consortium comprises the following types of members: Core Members, Full Members, and Affiliate Members. Eligible applicants for **Full Membership** are institutions in Europe with a documented strong profile on cancer prevention research. **Full Members** of the CPE consortium can initiate research projects within CPE and participate with a reduced registration fee in the biennial European Cancer Prevention Workshop to be organized by CPE. **Full Members** will also have access to the Members area of the CPE website.

We recommend Affiliate Membership for organizations, networks, or consortia consisting of member institutions active in cancer prevention research, implementation, or advocacy; for individuals with a documented role in cancer prevention research, implementation, or advocacy; and for research institutions that specialize in cancer research but not in cancer prevention research.

Please ensure that all information entered below is and up to date, and that you answer all questions accurately.
